NOAH Multi-hazard Map is composed of a combination of landslide, flood, and storm surge hazards maps. Landslide hazard map identifies areas that may be affected by landslides; floods were simulated at a 100-year rain return scenario; and storm surge simulation was based on maximum storm tide heights of 5 meters.

An NOAA Multi-hazard Map ay kombinasyon ng landslide, flood, ripan storm surge hazard maps. Na landslide hazard map, ang mga areas na maaaring i-afektar ng landslide ay identihihan. Ang flood hazard map ay identihihan ang mga areas na maaaring i-afektar ng flood. Ang storm surge simulation ay base sa maximum storm tide height ng 5 metro.
