Multi-hazard Map
Gahoy
Guiuan, Eastern Samar

Legend
- Evacuation
- Residential
- Evacuation Route
- Barangay Boundary
- Municipal Boundary
- Roads
- Tsunami (READY Project)
- Tsunami Hazard

NOAH Multi-hazard Map is composed of a combination of landslide, flood, and storm surge hazards maps. Landslide hazard map identifies areas that may be affected by landslides; floods were simulated at a 100-year return period; and storm surge simulation was based on maximum storm tide heights of 5 meters.

NOAH Multi-hazard Map compilation
- Evacuation GIS
- Residential GIS
- Evacuation Route GIS
- Barangay Boundary GIS
- Municipal Boundary GIS
- Roads GIS
- Tsunami (READY Project) GIS
- Tsunami Hazard GIS
