

# Multi-hazard Map Cantenio

Quinapondan, Eastern Samar

### Legend

- |                         |  |
|-------------------------|--|
| Evacuation              | NOAH Multi-hazard* Low                               |
| Residential             | NOAH Multi-hazard* Medium                            |
| Evacuation Route        | NOAH Multi-hazard* High                              |
| Barangay Boundary       | Liquefaction (READY Project) High Susceptibility     |
| Municipal Boundary      | Liquefaction (READY Project) Moderate Susceptibility |
| Roads                   | Liquefaction (READY Project) Low Susceptibility      |
| Tsunami (READY Project) | Tsunami Hazard                                       |

NOAH Multi-hazard Map is composed of a combination of landslide, flood, and storm surge hazards maps. Landslide hazard map identifies areas that may be affected by landslides; floods were simulated at a 100-year rain return scenario; and storm surge simulation was based on maximum storm tide heights of 5 meters.

An NOAH Multi-hazard Map ay kombinasyon han landslide, flood, ngan storm surge hazard maps. Ha landslide hazard map, guinbibiling an mga lugar nga posible maapektuhan han mga landslide; ha pagbaha, guingamit an 100-year rain return scenario ha pag-simulate; guinbasihan ha storm surge simulation an storm tide height nga maabot ha 5 ka-metro.
