| Evacuation Route | High |
| Barangay Boundary | Liquefaction (READY Project) High Susceptibility |
| Municipal Boundary | Moderate Susceptibility |
| Roads | Low Susceptibility |
| Tsunami (READY Project) | |
| Tsunami Hazard | |

Paco

NOAH Multi-hazard Map is composed of a combination of landslide, flood, and storm surge hazards maps. Landslide hazard map identifies areas that may be affected by landslides; floods were simulated at a 100-year rain return scenario; and storm surge simulation was based on maximum storm tide heights of 5 meters.

An NOAH Multi-hazard Map ay kombinasyon han landslide, flood, ngan storm surge hazard maps. Ha landslide hazard map, guinbibiling an mga lugar nga possible maapektuhan han mga landslide; ha pagbaha, guingamit an 100-year rain return scenario ha pag-simulate; guinbasihan ha storm surge simulation an storm tide height nga maabot ha 5 ka-metro.
