

# DISPLACEMENT TRACKING MATRIX

## MOSUL CORRIDOR EMERGENCY DISPLACEMENT ANALYSIS TRACKING

The Emergency Tracking (ET) system tool is aimed at tracking sudden population displacements or return movements triggered by specific crises. The ET figures are not cumulative, rather they provide a snapshot of the population currently displaced on the indicated date. This dashboard merges three ET datasets: **1) Salah al-Din and Ninewa ET** covers the displacement caused by the military operations in Shirqat and Baiji districts (Salah al-Din governorate), and Qayara sub-district (Ninewa governorate) since mid-June 2016; **2) Hawija ET** covers the displacement due to the clashes in Hawija district (Kirkuk governorate) since August 2016; **3) Mosul Operations ET** covers the displacement caused by military operations since 17 October 2016. The dashboard includes also the displacement caused by the military operations in **Makhmur district** at the end of March 2016.
