

Project: Construction materials to Weno, Chuuk, Federated States of Micronesia

Bid Bulletin No.1

Date: April 29, 2022

Responses and comments to general and technical requirements with regard to the RFQ on Supply and delivery of Construction materials to Weno, Chuuk, Federated States of Micronesia

1. I noticed in the bid documents that you are requesting Option 1 to quote with all materials to be grouped and packed per each house. Please confirm we can skip option 1 and just quote option 2 and our bid will still be accepted.

IOM Response: IOM needs quotation for both options and will consider both of them.

2. Normally some extra quantities may be added, but it looks like you are just asking for exact quantities with no extra. Please confirm this is correct.

IOM Response: Quantities needed/enough for the project are calculated and indicated in the Request for quotation.

3. Will the 40 New Houses and Reconstruction of 5 Public Infrastructure and Utilities lists all be awarded together to same company for shipment at same time? We need this info to know how to price out the 5 Public Infrastructure and Utilities lists.

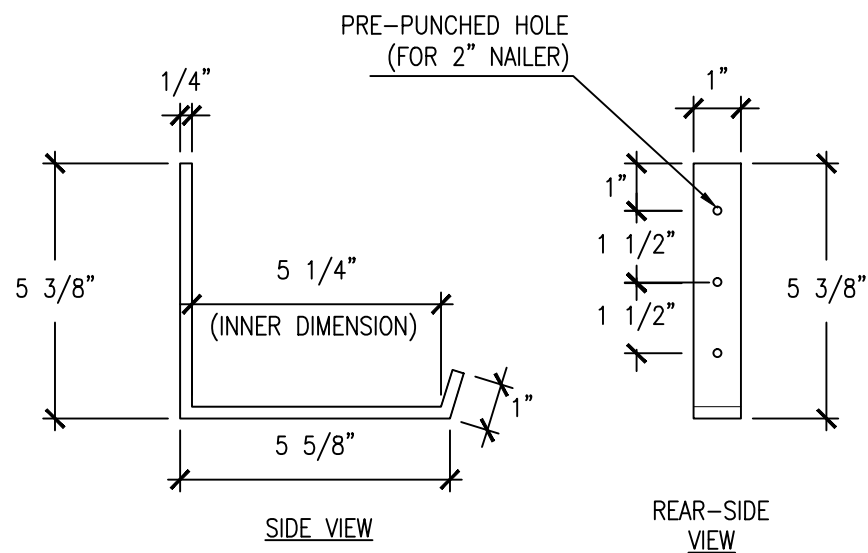

IOM Response: Offers for Construction materials to build 40 New Houses (Annex B1) and for Construction materials for Reconstruction of 5 Public Infrastructure and Utilities (Annex B2) will be evaluated separately. Contract/s may be awarded to the same or different Bidders depend on results of evaluation.

4. On the 5 Public Infrastructure and Utilities lists there is some lumbers that just says "Lumber Regular Grade", does this not need to be treated lumber?

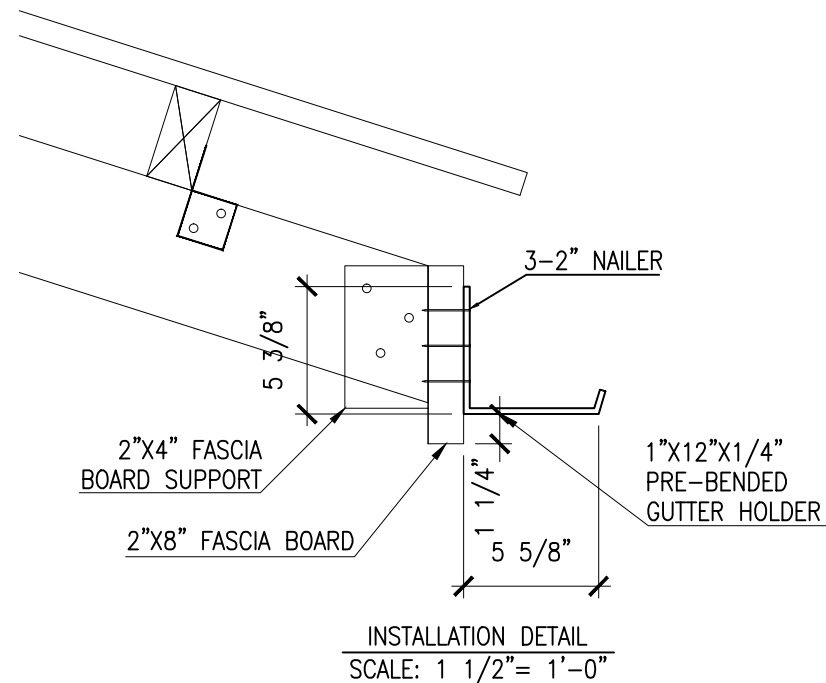

IOM Response: That is correct, Lumbers where there is no requirement to be treated not need to be treated.

5. On the 5 Public Infrastructure and Utilities lists please send me a detail drawing for the Prefab Box Gutter, Galvalume 24" x 8ft L, ga. 26, (White) w/ 3 pcs Prebended

IOM Response: Please find drawings attached hereto.
