

MANILA SUPPLY CHAIN UNIT (MSCU)	
TO: Bidders	FROM: Niiara Abliamitova Head, Manila Supply Chain Unit (MSCU)
NO. OF PAGES INCLUDING COVER SHEET: - <u>2</u> -	DATE: Jun 7, 2023
SUBJECT: MSCU Invitation to Bid (ITB) 23-187 – Amendment No. 2 - Supply and Delivery of Migration Information and Data Analysis System (MIDAS) Equipment (LTA)	

1. This Amendment #2 to the MSCU ITB 23-187 is issued to incorporate questions and answers from the bidders’ conference and the request for clarifications.

#	Query/Clarification	IOM Response
1	For the 240GB SSD stated in the Excel, is it used to host the OS?	Yes, 240 GB is only available in ML (Tower) server.
2	What is the workload for both the central and local servers?	Depends on the border point’s traffic. The memory will be mostly used for query and matching algorithms. For busy border points we advise minimum 64 GB RAM.
3	What operating system or virtualization software do you plan to run on the central and local servers?	Windows Server
4	What is the average size of the data you are backing up? (pre-compression)	Between 50 to 400 GB, depends on the size of the database. The database is backed up daily with overwrite option.
5	Kindly confirm the form factor required to quote for a sub-category desktop computer is comparable to HP Elitedesk 800.	One of the most important requirement is the amount of USB ports. Min. 5 ports are required to plug the equipment. And the size of the computer depends on the space availability in a booth at the border point. If HP Elitedesk is selected, it would be good to look for a similar sized computer.

ANY UNAUTHORIZED DISCLOSURE, COPYING, DISTRIBUTION OR OTHER USE OF THE INFORMATION HEREIN IS STRICTLY PROHIBITED. If you have erroneously received this facsimile transmission, please notify the United Nations immediately. Thank you.

6	Please advise some more specifications for Line item 88 under Lot 1 – Power Stabiliser	We don't have any specifications because they may vary from country to country. The IOM procuring country office should inform. The aim is to transfer the stable power to avoid equipment to get damaged.
---	--	--

2. All other terms and conditions of the MSCU ITB 23-187 remain unchanged.
