PROTECTING YOUR HOUSE DURING A TYPHOON

Tie-down your house
Use wires, ropes, and nets.

Protect windows and openings.

Elevate valuable items, and important documents.

Clear dangerous items away from your house.

COMMUNICATION
- Know how you can receive information about the typhoon
- Know how to communicate with others after the typhoon
- Know where you can find information on missing persons

EVACUATION
- Decide early if you will evacuate or stay at home
- Prepare safe evacuation route
- Know where the evacuation sites are
- Know what transport you can use

GRAB BAG
- Prepare a waterproof ‘Grab Bag’ prior to typhoon
- Make ‘Grab Bag’ easy to carry and include:
  - Medical kit
  - Extra clothing
  - Safe shoes
  - Basic tools
  - Basic food
  - Cooking equipment
  - Torch and matches
  - Important personal records

Follow these steps to minimize damage to your house, regardless if you stay at home or evacuate.
