

1 NO POVERTY

TARGET 1.3
Implement social protection systems including floors and achieve sustainable coverage of the poor and vulnerable

Implement appropriate social protection systems in health that are inclusive of migrants, are free of discrimination, and sensitive to the contemporary mobility of persons, including through cross-border portability of entitlements and rights; reduce out-of-pocket payments for health care and catastrophic health expenditures; achieve coverage through sustainable and innovative financing.

TARGET 1.5
Strengthen resilience of the poor and most vulnerable to economic, social and environmental shocks and disasters

Ensure migrants' and mobile populations' resilience in the context of crises, and reduce their health vulnerability linked to climate change, extreme events, and other economic, social and environmental shocks and disasters causing large scale population displacement within and across borders.

3 GOOD HEALTH AND WELL-BEING

TARGET 3.8
Achieve Universal Health Coverage

Ensure the inclusion of migrants, regardless of their legal status, in 'Universal Health Coverage'; ensure they are accounted for in financial risk protection schemes; have access to quality, equitable health care services, safe, effective and affordable essential medicines and vaccines, and cross-border continuity of health care. Include migrants and mobile populations in disease prevention and control programmes. Not doing so, counters public health principles, ethics and universal health care goals.

TARGET 3.c
Increase health financing and establish a sufficient health workforce in developing countries

Increase health workforce financing, recruitment, development, training and retention in developing countries; enhance the local integration of migrant-, refugee- and displaced health personnel; manage migration of health care workers and implement the international code of recruitment of health personnel.

TARGET 3.d
Increase capacity of countries for early warning, risk reduction and management of national and global health risks

Strengthen the capacity of countries in early warning, health risk reduction and management of national and global health risks, including disease prevention and control, and health emergency preparedness and response (International Health Regulations, 2005) that address public health risks associated with migration and population mobility.

5 GENDER EQUALITY

TARGET 5.2
Eliminate all violence against women and girls

Eliminate all forms of violence against all migrant women and girls and their physical, mental and social well-being impact, including trafficking and all types of exploitation, marginalization, discrimination and abuse.

TARGET 5.6
Ensure universal access to sexual and reproductive health and reproductive rights

Ensure that universal access to sexual and reproductive health and rights, in accordance with the programme of action of the 1994 International Conference on Population and Development (ICPD) and the Beijing Platform for action, applies without discrimination to migrant populations whose sexual and reproductive health can be at disproportionate risk due to the circumstances of the migration process.

8 DECENT WORK AND ECONOMIC GROWTH

TARGET 8.7
Eradicate forced labour, end modern slavery and human trafficking; eliminate child labour

End the use of migrants for forced labour, child labour, modern slavery, and human trafficking, and address the multiple associated health risks due to unsafe, poor working and living conditions, and the various forms of exploitation, discrimination and unsafe health practices throughout the migration process.

TARGET 8.8
Protect labour rights and promote safe and secure working environments for all workers including migrant workers

Address the health needs and promote 'decent work' of migrant workers, especially women and those with 'irregular' status, who are exposed to multiple health risks, including poor working and living conditions and exploitation, and ensure their equitable access to health services; end deportations and travel restrictions due to health conditions.

10 REDUCED INEQUALITIES

TARGET 10.7

Orderly and safe migration through well-managed migration policies

Mainstream the health of migrants, their families and communities in migration governance discourses. Recognize migration as a determinant of health which can expose migrants to multiple health risks during all phases of the migration process. Enhance the health of migrants through improved policy coordination among sectors that impact the health of migrants and respect migrants' right to health to ensure equitable access to health services. Ensure immigration health assessment practices follow public health principles and international standards of care.

11 SUSTAINABLE CITIES AND COMMUNITIES

TARGET 11.1

Access to adequate housing and basic services; upgrade slums

Ensure that access for all to adequate, safe and affordable housing and basic services includes migrants, who can be at elevated risk of poor living conditions, whether in camps, informal settings, migration centres, detention or slums; and reduce health risks due to overcrowding, poor hygiene and sanitation.

TARGET 11.5

Reduce deaths and number of people affected and decrease the economic losses following disasters

Ensure that reducing the number of deaths and number of people affected, and decreasing the economic losses following disasters includes the protection of displaced persons, as well as other vulnerable migrants and mobile populations who may not have been included in disaster risk reduction plans. Disasters, by defaults, trigger large scale displacement.

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

TARGET 16.1

Reduce violence and related death rates

Reduce all forms of violence associated with migration and save lives especially in the context of conflict, smuggling and trafficking, putting migrants at disproportionate risk due to unsafe travel and living conditions and associated vulnerability to sexual, physical and psychological violence.

TARGET 16.2

End abuse, exploitation, trafficking, violence against and torture of children

End abuse and exploitation of trafficked and young migrants, especially unaccompanied minors, as they are at increased risk of abuse, exploitation, and violence, and the associated physical and mental health risks.

17 PARTNERSHIPS FOR THE GOALS

TARGET 17.16

Utilize global and multistakeholder partnerships to support the achievement of sustainable development goals in all countries

Utilize multi-sectoral and international partnerships, as migrants inherently connect sectors, communities, countries and regions. Enhance the health of migrants and public health by coordinating among health and other sectors in society, and through the inclusion of migration and health in cross border, regional and global development dialogues and humanitarian responses.

TARGET 17.18

Assist developing countries in increasing the availability of high-quality data disaggregated by migratory status

Enhance capacity building to increase the availability of data disaggregated by income, gender, age race, ethnicity, migration status, [...] including in the health sector to allow the monitoring of the health of migrants and the implementation of policies and legislations affecting the health needs of migrants.
