

# MIGRANT WOMEN'S DEATHS IN 2017

Since IOM's Missing Migrants Project began collecting data in 2014, it has recorded the deaths of

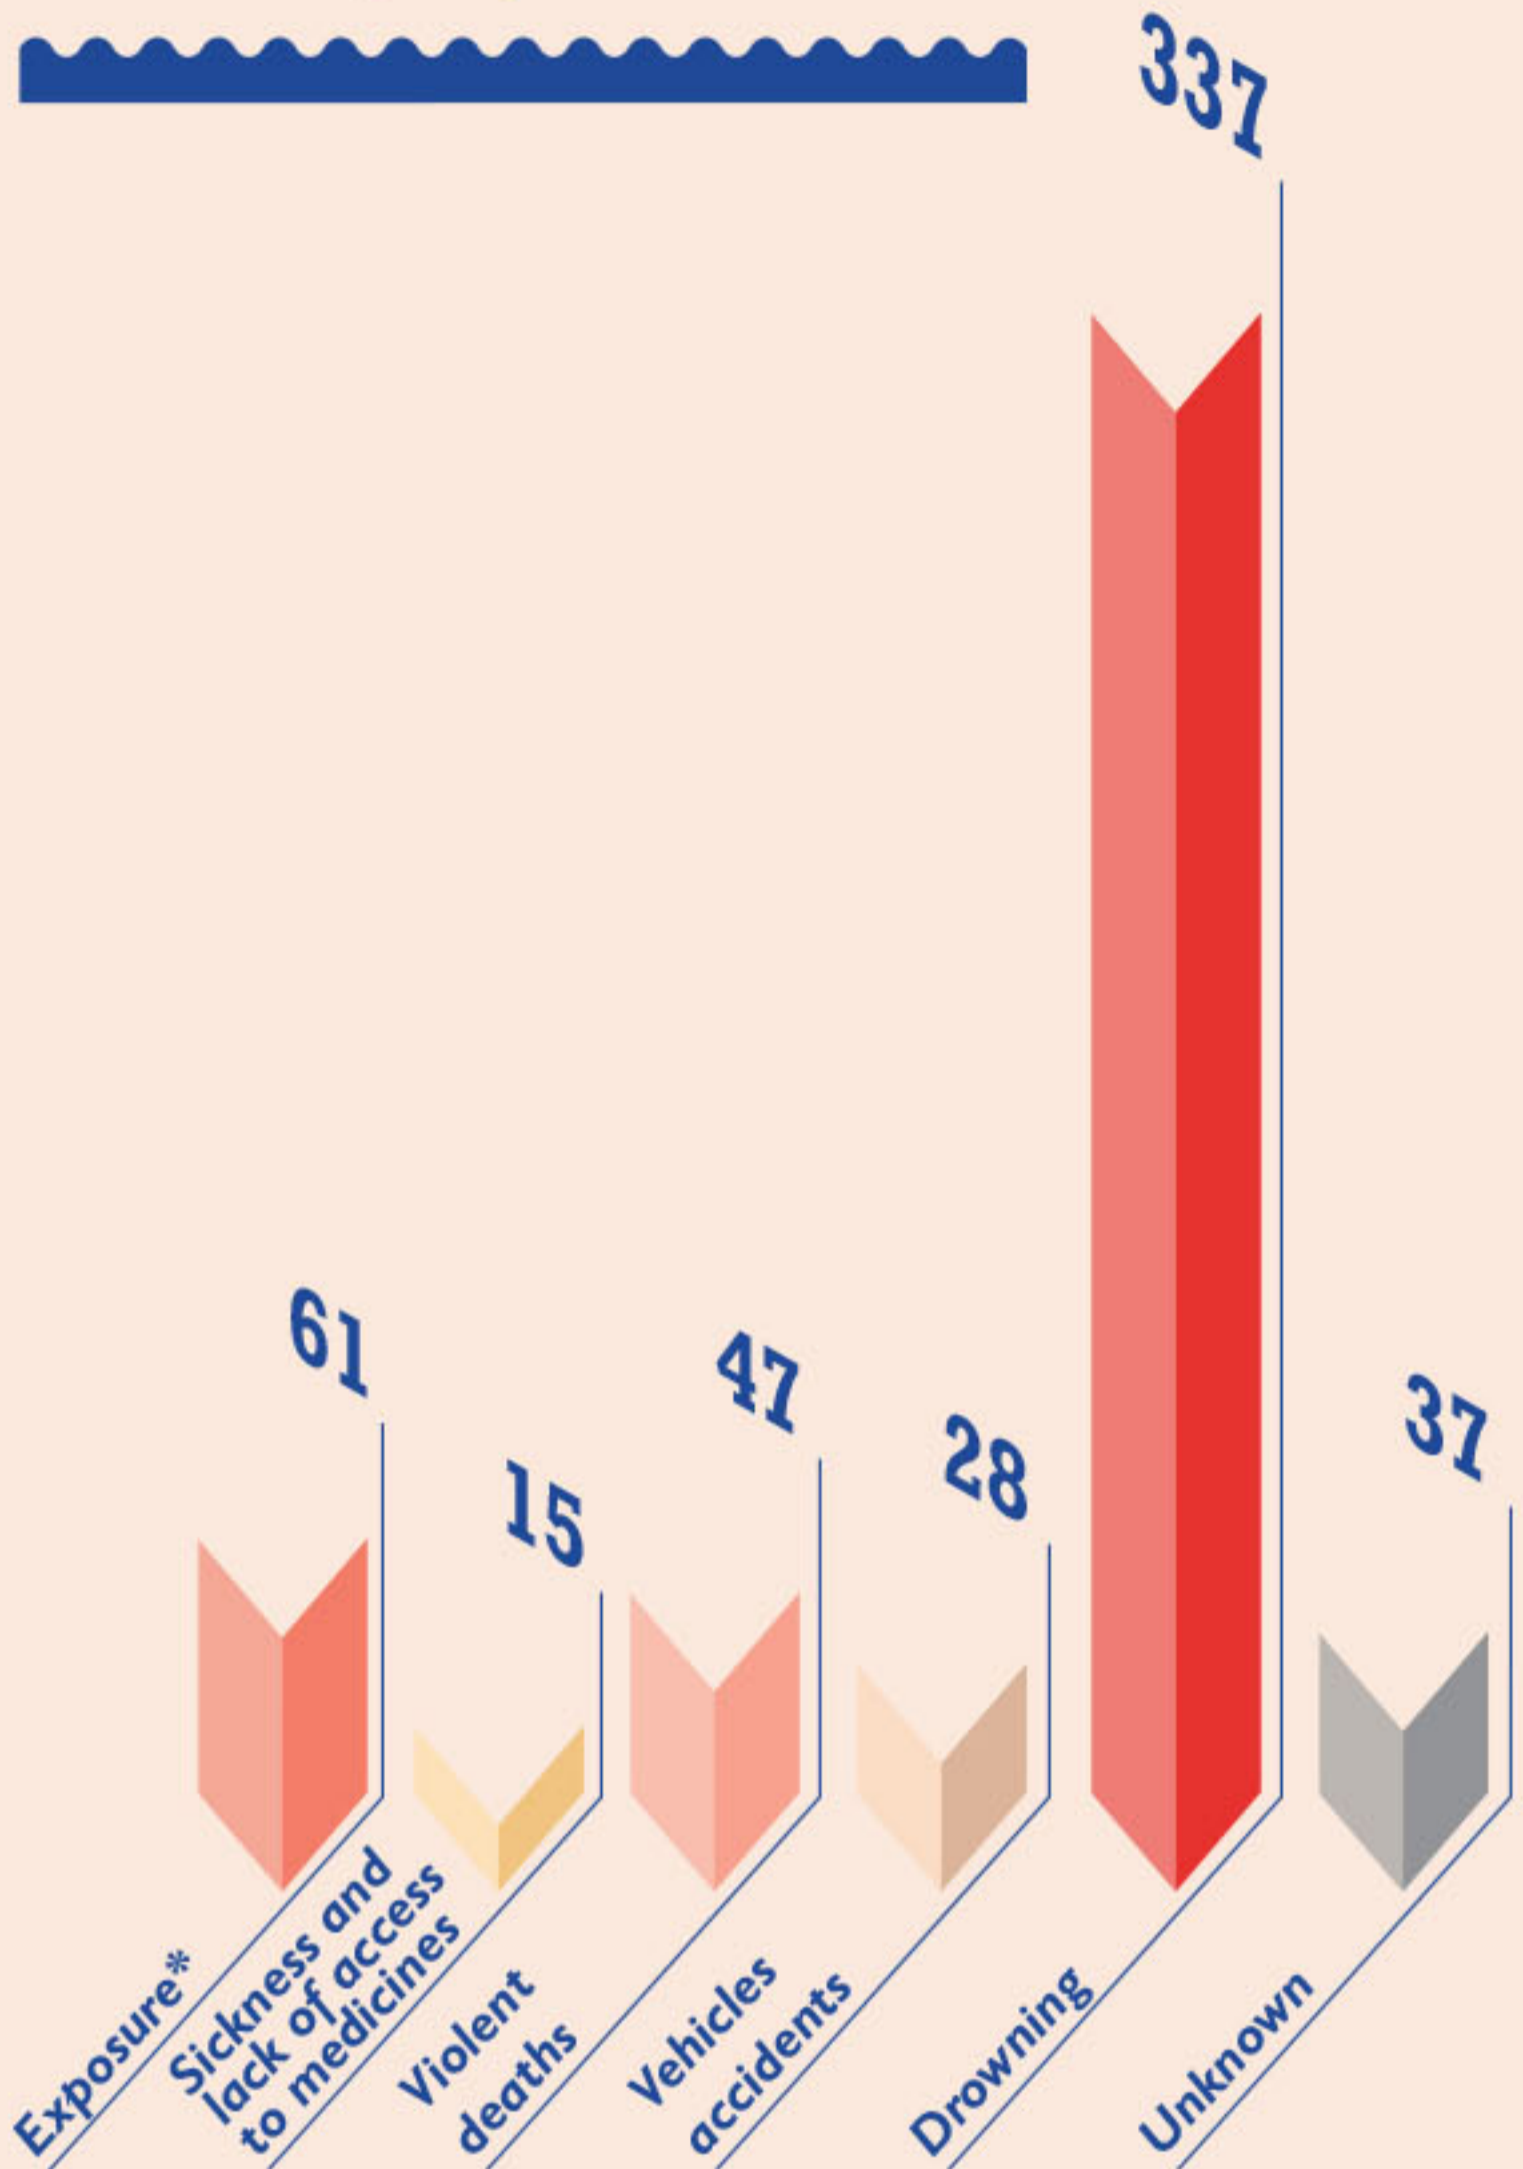

## DEATHS BY REGION OF ORIGIN

## DEATHS BY CAUSE

The vast majority of recorded migrant women's deaths were due to drowning – 337 women lost their lives while crossing a body of water.

\* Exposure includes death by hypothermia, hyperthermia, heat exhaustion, dehydration, etc.

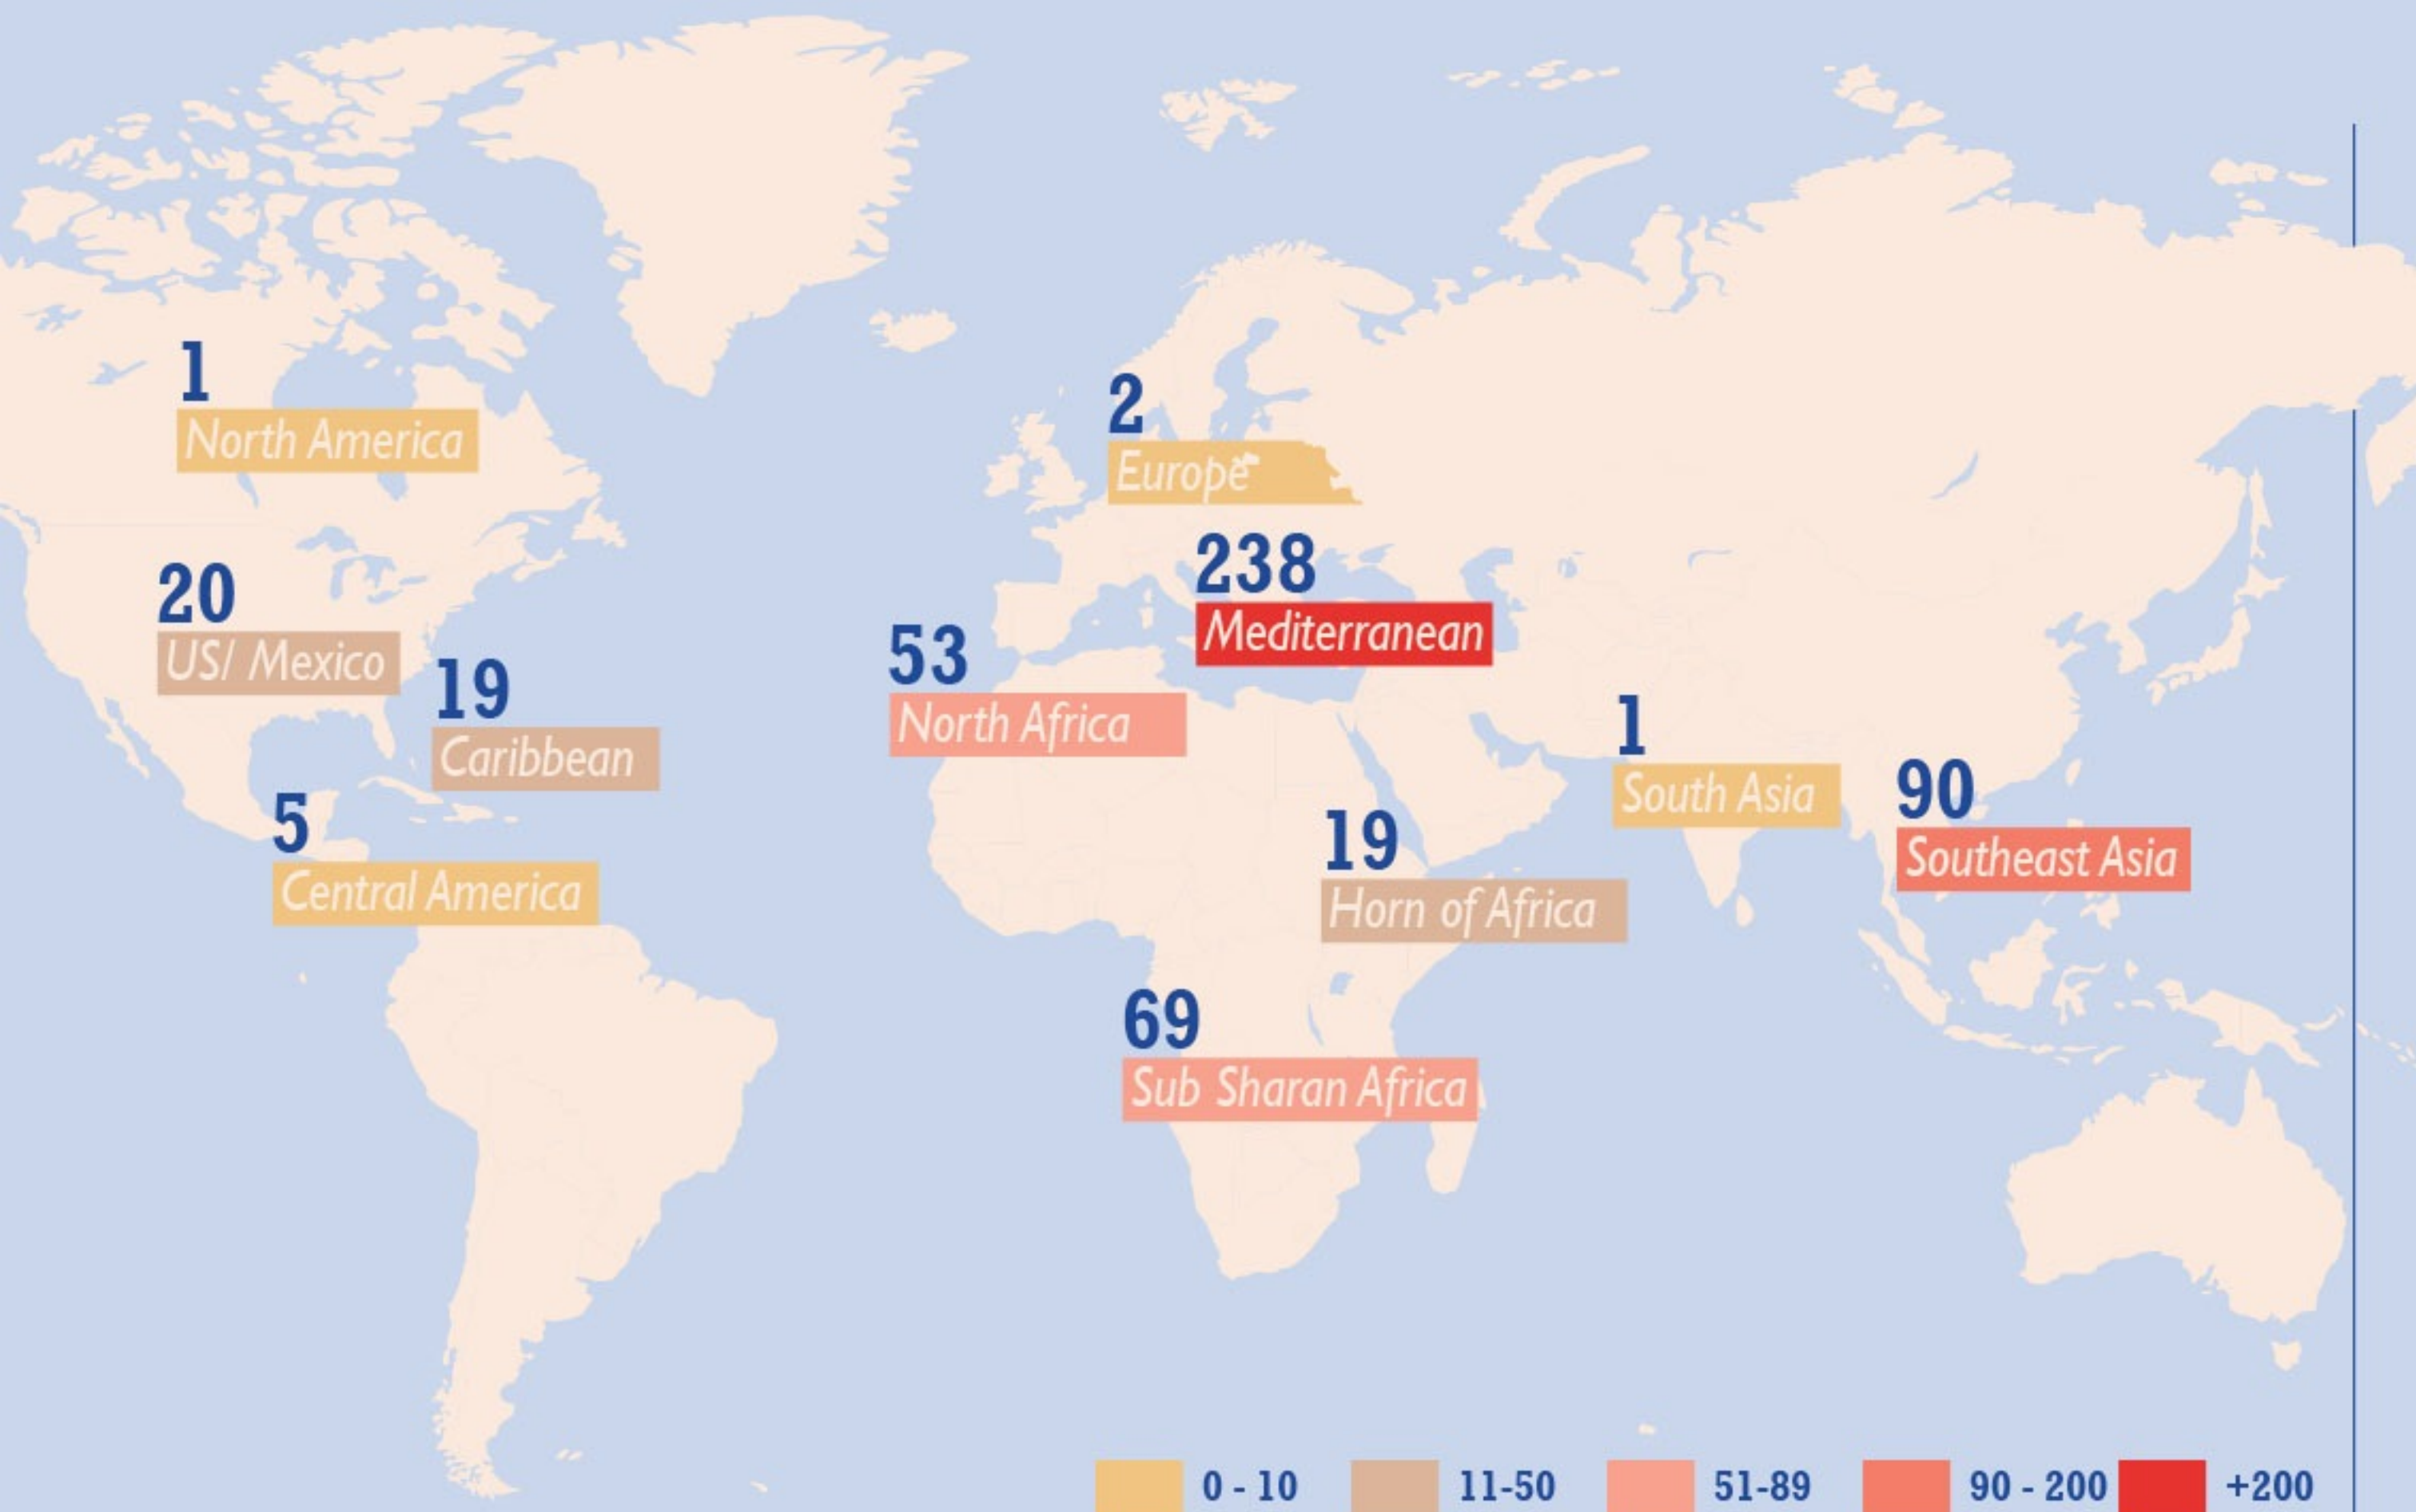

As many deaths of women occur at sea, and in large numbers, the identities of those who die often remain unknown.
